

DUSKY COLOR

Subtle darkness, radiant individuality.

Precautions for Use

• Please read all instructions on the individual box (outer packaging) carefully before use, and follow them correctly. • Do not use if you have previously experienced an allergic reaction to hair color. • Oxidative hair dyes are more likely to cause allergies than other coloring agents. In some cases, allergic contact dermatitis may become severe enough to disrupt daily life. • Even if you have never had a reaction to oxidative hair dyes before, repeated use may lead to allergic contact dermatitis. • If you have an allergy, symptoms may recur even after they subside, and can worsen with continued use, potentially leading to systemic symptoms. • The risk of allergy increases with repeated exposure to oxidative hair dyes. • Always perform a skin allergy test (patch test) before each use of oxidative hair dye. • If you experience any abnormal reactions during coloring, discontinue use immediately and seek medical attention.
